Time: 10:00 a.m. to 1:00 p.m.

Fee: \$ 45.00 (Includes all materials)

We will work with a limited palette – primary colors, cyan, magenta, and yellow. The goal is to use minimal colors to mix secondary, tertiary, and the complete color wheel. We will explore mixing to achieve a better understanding of color and its properties. The goal is to make more effective color statements in our paintings. We will explore how color works, touch on color theorists who have been instrumental and effected how we understand and apply color to our painting and drawing life. We will review Delacrix's color triangle, Josef Albers and Munsell color theory; Hue, Chroma, Value and relationships of juxtaposed color, looking at examples of Monet, Gauguin, Serat, and Vincent van Gogh, to name a few. Strong reference to color wheel for understanding of why and how colors affect each other. We will discuss and review examples of color application and end up working on a grey toned image; Giclee on 140lb D'Arches cold press. Our goal is to apply the theories and understanding of color relationships to achieve even stronger paintings.
